

## Passenger Facility Charges

In accordance with legislation adopted by the U.S. Congress, individual airports in the United States may assess a Passenger Facility Charge (PFC) against enplaning passengers. Such PFCs are to be used by the airports to fund FAA-approved airport improvement projects. Once the FAA has approved a PFC, the legislation requires airlines and travel agents to collect PFC's from their passengers.

As a result of legislation enacted during 2000, airports may impose a PFC of as much as \$4.00 or \$4.50 on an enplaning passenger. Previously, PFC's could only be imposed in the amounts of \$1.00, \$2.00, or \$3.00. The new legislation does not automatically increase any existing PFC, but permits airports to seek permission to impose fees in the higher amounts. Several airports have obtained permission to impose the higher PFC's. Collection of PFC's in the increased amounts was allowed beginning during 2001.

While CRSs have programmed for PFC collection to automatically apply on computer generated tickets, travel agents will need to know the PFC application for manually prepared tickets, exchanges and refunds.

### General Questions and Answers

#### What is a Passenger Facility Charge?

The U.S. Congress has enacted a law that permits airports to impose a fee of \$1, \$2, \$3, \$4 or \$4.50 on enplaning passengers. Such fees are to be used by the airports to fund FAA- approved airport improvement projects. The legislation requires the air carriers and their agents to collect such fees with the air carriers subject to financial penalties for non-compliance.

#### From whom are PFCs collected?

A PFC will be imposed on all revenue passengers enplaned at an airport authorized to collect PFCs. Revenue passengers, for this purpose, do not include travel agents traveling on agent discount tickets (e.g., AD 50, AD 75).

#### How will these Charges be collected?

The charges are collected by the airlines and travel agents at the time of ticket issuance. Agents remit the charges through ARC along with other fees and taxes, and the airlines distribute the funds to the appropriate airports.

#### When are PFCs to be collected?

Any ticket issued on or after the effective date of a PFC must reflect the specific PFC and its related airport. The PFC is assessed for a departure from an airport, not arrival.

#### How many PFCs can be collected on One Ticket?

No more than two PFCs can be imposed on any one-way ticket and no more than four on any round trip. If a one-way trip involves more than two airports that have PFCs, the charges are limited to the first two PFC-approved airports in the itinerary. For a round trip with multiple segments, PFCs are collected for the first two and the last two PFC-approved airports (excluding the destination city because PFCs are only collected on enplanement cities).

#### Definition of a Round Trip:

A Round Trip is a trip on which the complete air travel itinerary originates and terminates at the same point.

#### Definition of a Point:

Airports serving the same locality, i.e., co-terminals with the same city code. The FAA will determine annually (Jan. 1 of each year) multiple/co-terminal airports, e.g., San Francisco International (SFO) and Metropolitan Oakland International (OAK). Note: A listing of multiple/ co-terminal airports is provided on page 3 of this section.

#### How Are PFCs to be Reflected on the Ticket?

Each PFC paid by the passenger and the airport for which it is collected are to be shown on the ticket. The sum of all the PFCs collected is shown in the tax box using the code XF and is included in the total amount paid. PFC details are shown in the Fare Calculation area. For example: XFLAS3 means a PFC was collected for an enplaning passenger at Las Vegas, NV for \$3.00.

#### Are PFCs Collected for Air Transportation between Two Airports Listed as Being Co-Terminals?

A PFC will be collected if the passenger is departing a PFC airport and flying to a different airport (by airplane or helicopter) even though both airports are listed as co-terminal points.

#### Are PFCs to be collected on PTAs?

Yes, with the date of issue of the PTA determining whether a specific PFC applies. For a PTA written in the U.S. for a ticket to be issued outside the U.S. for travel commencing outside the U.S., contact the PTA Desk to determine the carrier's policy on collecting PFCs.

**If all Tickets issued in the U.S. are to include Applicable PFCs, What is considered the U.S.?**

The U.S. is defined as the fifty states, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Trust Territory of the Pacific Islands, and Guam.

**Are there any Airport Exceptions to PFC Collection?**

The only exception to the general PFC collection rules is that a PFC is not to be collected from a passenger for an enplanement on any flight to an eligible point on an air carrier that receives subsidy as part of the Essential Air Service (EAS) compensation under Section 419 of the Federal Aviation Act, e.g., air service provided by Atlantic Southeast Airlines from Atlanta to Muscle Shoals, AL. Each time a new PFC is announced, ARC agents will be informed of any special limitation for EAS flights.

**What happens when a Ticket is exchanged?**

Any unused PFCs collected on the ticket being exchanged must be refunded (in effect) and any additional charges from the new ticket collected. Details and examples are provided in the Refund Exchange Section of this Handbook.

**Are PFCs Refundable?**

The general rule is that anytime a ticket is refunded, so are the PFCs. When the ticket is not refunded, neither are the PFCs. Details and examples are provided in the Refund Exchange Section of this Handbook.

**Where do I Show PFC's on a Manual Ticket?**

When a Passenger Facility Charge (PFC) is collected, the airport to which the PFC applies, and the amount indicator reflecting the dollar amount collected (1=USD 1.00 2=USD 2.00 3=USD 3.00 4=USD 4.00 4.5=USD 4.50) must be shown at the end of the Fare Calculation ladder on the ticket.

When the last fare entry has been completed in the fare calculation ladder, draw a single heavy line underneath. This will now be the area where the PFC's are to be indicated. Enter the PFC indicator code of "XF" under the column titled **FROM/TO**. Leave the column titled **CARRIER**, blank. In the column titled **FARE CALCULATION**, enter in itinerary order, the airport code, followed by the PFC amount indicator. This entry is mandatory.

**EXAMPLE**

FROM/TO	CARRIER	FARE CALCULATION			
TPA					
CHI	TW	120.00			
LAX	UA	190.00			
PHX	DL	140.00			
XF		TPA3			
		ORD4.5			
			COMM. RATE	FARE	450.00

**Where Do I Show PFC's on a Prepaid Ticket Advice?**

When a Passenger Facility Charge (PFC) is collected, the airport to which the PFC applies and the amount indicator reflecting the dollar amount collected (i.e. 3 = USD 3.00) must be shown in the lower, right hand corner of the "Routing/Fare Basis/Reservation Data" box. For each PFC collected, enter in itinerary order, the airport code followed by the PFC amount indicator.

The total amount of all PFC's collected is entered in the "OTHER TAX" box preceded by the PFC code of XF.

**EXAMPLE**

ROUTING/FARE BASIS/RESERVATION DATA
JFK3SAV4.5 MSP4.5ORD4.5

**Where do I Call for Additional Help?**

- Application to a specific routing being ticketed - call the airline.
- Application to exchange or refund transaction - call ARC Travel Agency Services at (703) 816-8003.

**Listing of Multiple/Co-Terminal Airports to be used only for determining whether a Round Trip returns to the Origin Point for Purposes of PFC Application**
